## 2024\_28\_III\_OOPS Using Java Lab

### REC\_2028\_OOPS using Java\_Week 8\_MCQ

Attempt : 1

Total Mark : 15

Marks Obtained : 11

#### **Section 1 : MCQ**

1. Which of the following is true about custom exceptions?

**Answer**

Custom exceptions must extend either Exception or RuntimeException

**Status : Correct**

**Marks : 1/1**

2. How do you create an unchecked custom exception?

**Answer**

By extending RuntimeException

**Status : Correct**

**Marks : 1/1**

3. What will be the output of the following code?

```
class MyException extends Exception {  
    public MyException() {  
        super("Default Exception Message");  
    }  
}
```

```
class Test {  
    public static void main(String[] args) {  
        try {  
            throw new MyException();  
        } catch (MyException e) {  
            System.out.println(e.getMessage());  
        }  
    }  
}
```

**Answer**

Default Exception Message

**Status : Correct**

**Marks : 1/1**

4. What will be the output for the following code?

```
import java.io.*;
```

```
class UnderageException extends Exception {  
    public UnderageException(String message) {  
        super(message);  
    }  
}
```

```
class Test {  
    public static void main(String[] args) {  
        try {  
            int age = 17;  
            if (age < 18) {  
                throw new UnderageException("Underage, cannot proceed");  
            }  
        } catch (UnderageException e) {  
            System.out.println(e.getMessage());  
        }  
    }  
}
```

```
        }
    } catch (UnderageException e) {
        System.out.println(e.getMessage());
    }
}
```

**Answer**

Underage, cannot proceed

**Status : Correct**

**Marks : 1/1**

5. What will be the output for the following code?

```
import java.io.*;

class TemperatureTooHighException extends Exception {
    public TemperatureTooHighException(String message) {
        super(message);
    }
}

class Test {
    public static void main(String[] args) {
        try {
            int temperature = 110;
            if (temperature > 100) {
                throw new TemperatureTooHighException("Temperature too
high");
            }
        } catch (TemperatureTooHighException e) {
            System.out.println(e.getMessage());
        }
    }
}
```

**Answer**

Temperature too high

**Status : Correct**

**Marks : 1/1**

6. What will be the output for the following code?

```
import java.io.*;

class OutOfStockException extends Exception {
    public OutOfStockException(String message) {
        super(message);
    }
}

class Test {
    public static void main(String[] args) {
        try {
            int stock = 0;
            if (stock == 0) {
                throw new OutOfStockException("Item is out of stock");
            }
        } catch (OutOfStockException e) {
            System.out.println(e.getMessage());
        }
    }
}
```

**Answer**

Item is out of stock

**Status : Correct**

**Marks : 1/1**

7. What will be the output for the following code?

```
class NegativeBalanceException extends Exception {
    public NegativeBalanceException(String message) {
        super(message);
    }
}
```

```
class Test {
    public static void main(String[] args) {
        try {
```

```
        double balance = -500;
        if (balance < 0) {
            throw new NegativeBalanceException("Balance cannot be
negative");
        }
    } catch (NegativeBalanceException e) {
        System.out.println("Error: " + e.getMessage());
    }
}
```

**Answer**

Error: Balance cannot be negative

**Status : Correct**

**Marks : 1/1**

8. What will be the output for the following code?

```
class InvalidVotingAgeException extends Exception {
    public InvalidVotingAgeException(String message) {
        super(message);
    }
}

class Test {
    public static void main(String[] args) {
        try {
            int age = 15;
            if (age < 18) {
                throw new InvalidVotingAgeException("You are not eligible to
vote");
            }
            System.out.println("Eligible to vote");
        } catch (InvalidVotingAgeException e) {
            System.out.println(e.getMessage());
        }
    }
}
```

**Answer**

You are not eligible to vote

**Status : Correct**

**Marks : 1/1**

9. What will be the output for the following code?

```
import java.io.*;  
  
class NegativeAgeException extends Exception {  
    public NegativeAgeException(String message) {  
        super(message);  
    }  
  
    class Test {  
        public static void main(String[] args) {  
            try {  
                int age = -5;  
                if (age < 0) {  
                    throw new NegativeAgeException("Age cannot be negative");  
                }  
            } catch (NegativeAgeException e) {  
                System.out.println(e.getMessage());  
            }  
        }  
    }  
}
```

**Answer**

Exception occurred

**Status : Wrong**

**Marks : 0/1**

10. what is the output of the following code?

```
class MyException extends Exception {  
    public MyException(String message) {  
        super(message);  
    }
```

```
        }  
    }  
  
class Test {  
    static void check() throws MyException {  
        throw new MyException("Custom Exception Occurred");  
    }  
  
    public static void main(String[] args) {  
        try {  
            check();  
        } catch (Exception e) {  
            System.out.println(e.getMessage());  
        }  
    }  
}
```

**Answer**

Custom Exception Occurred

**Status : Correct**

**Marks : 1/1**

11. What will happen if a checked custom exception is thrown inside a method without being caught or declared?

**Answer**

Runtime Exception

**Status : Wrong**

**Marks : 0/1**

12. What will be the output for the following code?

```
class InvalidUsernameException extends Exception {  
    public InvalidUsernameException(String message) {  
        super(message);  
    }  
}
```

```
class Test {  
    public static void main(String[] args) {  
        try {  
            String username = "abc";  
            if (username.length() < 5) {  
                throw new InvalidUsernameException("Username must be at  
least 5 characters long");  
            }  
        } catch (InvalidUsernameException e) {  
            System.out.println(e.getMessage());  
        }  
    }  
}
```

## **Answer**

abc

**Status :** Wrong

**Marks : 0/1**

13. what is the output of the following code?

```
class MyException extends Exception {  
    public MyException(String message)  
        super(message);  
    }  
}
```

```
24  
24  
class Test {  
    public static void main(String[] args) {  
        try {  
            throw new MyException("Error occurred");  
        } catch (MyException e) {  
            System.out.println(e);  
        }  
    }  
}
```

## **Answer**

Exception in thread "main" java.lang.Exception

**Status : Wrong**

**Marks : 0/1**

14. Which keyword is used to explicitly throw a custom exception?

**Answer**

throw

**Status : Correct**

**Marks : 1/1**

15. What is the purpose of a custom exception in Java?

**Answer**

To create user-defined exceptions for specific scenarios

**Status : Correct**

**Marks : 1/1**
